HIGH EFFICIENCY FURNACES

General Requirements for High Efficiency Furnace Rewards:

- Furnaces must have an annual fuel utilization efficiency (AFUE) of greater than 95 percent.
- Furnaces must have an electronically commutated motor (ECM). An ECM is sometimes referred to as a variable speed, constant-airflow, constant-torque, electronically efficient (EEM), or X-14 motor. A permanent split capacitor motor (PSC), single- or multi- speed, does not qualify.
- Furnaces must be a sealed combustion unit.
- Furnaces must be the primary heating source for the home's living space.
- Chimney liners must be installed where a high-efficiency gas furnace replaces an atmospherically-drafted furnace and only a water heater remains vented through the chimney. The interior opening left by the removed furnace must be closed with a metal cap and sealed with caulk or mortar.
- Must be an electric utility customer of Algoma Utilities.
- Natural gas furnaces are eligible. Electric and propane furnaces are not eligible.
- A pre-qualified equipment list is available at focusonenergy.com

95% or greater AFUE Furnace with Electronically Commutated Motor (ECM) - \$50 Reward:
