These figures reflect the renewables that we have contracted. Actual figures may vary according to resource availability. We annually report to you before August 1 of next year the actual resource mix of the electricity you purchased. These figures also reflect the power delivered to Choose Renewable's customers in 2017.

Choose Renewable resources come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the 2017 average mix of resources supplying your electric utility includes: Coal (48.0%), Nuclear (19.0%), Natural Gas (20.2%), wind (9.3%), hydro (2.2%) and other renewables (1.3%). This resource mix was prepared in accordance with FERC Form I requirements.

The average home in the United States uses 897 kilowatt-hours (kWh) per month. [Source: U.S. EIA, 2016]

At Algoma Utilities, we join forces with other local, not-for-profit utilities through WPPI Energy to share resources and lower costs.
