

START SAVING WITH A SMART THERMOSTAT

A smart thermostat is a Wi-Fi enabled device that “learns” your habits to help you manage home heating and cooling costs. It adjusts your HVAC equipment based on your home’s unique energy profile and the weather outside, so you can save energy and money without sacrificing comfort. A smart thermostat can save up to \$120 annually and typically pays for itself in two years.

For a limited time Algoma Utilities residential electric customers can purchase a new, currently-qualified smart thermostat and earn a \$25 rebate from the utility. To receive your incentive please complete and return the form below with proof of purchase and the model number.

SMART THERMOSTAT REBATE

To request your bill credit, return this completed form along with a copy of your receipt to our office, or scan and email to mbscherer@wppienergy.org

Customer Name (first, last)		Utility Account Number
Street Address		
City	State	Zip Code
Home Phone		Daytime Phone
