

RENEWABLE ENERGY MADE EASY

Supporting renewable energy leads to a more livable and healthier community. Choose Renewable is an easy option to support the growth of renewable energy in our local community and beyond.

Choose where your energy comes from

At Algoma Utilities, we strive to give you options. With Choose Renewable, you ensure that more of our energy is generated right here in the Midwest through a socially responsible energy mix of solar, wind and biogas resources.

Easy and accessible

Participating in the Choose Renewable takes just a few minutes. You can start (or stop) at any time. No equipment to buy or install, and no need to worry about payback periods or annual maintenance costs.

Low-cost renewable energy

Each block of renewable energy is only an extra \$2 per month. That's less than a good cup of coffee (and it won't keep you up at night)! Even better, it only takes three blocks of renewable energy to power the average home for a month.

To view the specific renewable energy sources that make up this program, visit wppienergy.org/renewablemix

How Choose Renewable Works:

- 1 Just \$2 per block per month on top of your normal monthly bill.
- 2 Produced from 100% renewable sources - solar, wind and biogas.
- 3 Each block equals 300 kilowatt hours (kWh) of energy. A typical home uses about 750 kWh each month.

$$\boxed{\$2.00 \text{ BLOCK}} = \boxed{300 \text{ kWh}}$$

Adding renewable energy is simple!

Signing up for Choose Renewable takes just a few minutes. You can start (or stop) your participation at any time and you can add as many blocks of renewable energy you like.
