PROGRAM ELIGIBILITY

- Efficiency study grant funding is available to support engineering/technical assessments, feasibility studies or specialized energy audits contracted to identify electrical efficiency improvements.
- Eligible studies may include, but are not limited to, compressed air systems, lighting specifications, refrigeration audits, HVAC system assessments, or process improvement studies.
- Grant funding is committed on a first-come, first-served basis and will cover 50% of the study costs, up to the per study limit of \$10,000.
- Studies must be scheduled for completion no later than the end of the calendar year.
- Eligible customers must receive electric service from a WPPI Energy member utility and have on site electric demand of 200 kW or greater. Public school facilities are also eligible regardless of electric demand.

STUDY GUIDELINES

1. A written proposal, including study costs and timeline, must be attached to this pre-approval application and approved by the utility prior to the start of any study to be eligible for funding.
2. Studies must result in specific recommendations for measurable and verifiable electrical efficiency improvements.
3. A final written report must be provided to the customer and utility, and contain the following information at a minimum:
 - Description and examination of existing equipment and system layout, with a baseline energy consumption and operating cost profile;
 - Summary of recommendations for improving equipment or facility energy performance;
 - Estimated project costs, with a breakdown of components such as equipment, labor, operation and maintenance;
 - For each recommendation, estimates of electric demand reduction (kW), annual energy savings (kWh), and project economics (e.g., energy cost savings, simple payback, IRR, other quantifiable benefits) with supporting calculations.
4. Study grants will be paid directly to the participating customer.
